[GitHub: mennamamdouhh](#) | [LinkedIn: menna-mohamed-8b69a3303](#)

PROFESSIONAL SUMMARY

Third-year Computer and Data Science student (GPA 3.9/4.0) with hands-on experience in full-stack web development, a strong foundation in algorithms and problem solving, and a keen interest in backend engineering. Completed ITI training in full-stack development with PHP, HTML, CSS, and JavaScript. Seeking a backend internship to contribute to scalable server-side systems and deepen expertise in backend technologies.

EDUCATION

Bachelor of Science — Computer and Data Science Expected Graduation: 2026

Faculty of Computer and Data Science • GPA: 3.9 / 4.0 • Year 3 of 4

Alexandria, Egypt

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript (ES6+), PHP

Backend: PHP, RESTful API concepts, Server-side scripting

Frontend: Responsive Design, DOM Manipulation, JSON data handling

Tools & Platforms: Git, GitHub, VS Code

Concepts: OOP, Data Structures, Algorithms, Problem Solving, DevOps fundamentals

TRAINING & CERTIFICATIONS

Full-Stack Web Development Training — ITI (Information Technology Institute) 2024

- Completed intensive training covering PHP, HTML, CSS, and JavaScript
- Built dynamic web pages and server-side scripts; applied MVC patterns with PHP
- Certificate: drive.google.com/file/d/1hWAOArAukWFWstcPB4oXnxEs5LsgpnRwG

ECPC (Egyptian Collegiate Programming Contest) — Problem Solving 2024

- Participated in competitive programming; strengthened algorithmic thinking and data structures
- Certificate: drive.google.com/file/d/13-YZBNH7ASb9EobQZCFQHYHc9o2RKND6

PROJECTS

Online Desserts — Interactive E-Commerce Front-End JavaScript | HTML | CSS

Live: <https://mennamamdouhh.github.io/Dessert-list-with-json/>

- Built a single-page dessert website with JSON-driven product loading and full cart functionality
- Implemented add-to-cart, quantity updates, and an order-confirmation modal with vanilla JavaScript
- Used fetch API to load product data from a JSON file, practicing asynchronous data handling relevant to backend API consumption

Digital Bank Landing Page — Responsive Web Application JavaScript | HTML | CSS

Live: <https://mennamamdouhh.github.io/digitalbank-landing-page/>

- Designed and developed a fully responsive landing page for a digital banking product
- Applied CSS Grid and Flexbox for adaptive multi-breakpoint layouts; optimized for mobile and desktop
- Demonstrates understanding of UI/UX patterns used in fintech web products

Interactive Card Details Form — Real-Time Validation UI JavaScript | HTML | CSS

Live: <https://mennamamdouhh.github.io/Interactive-card-details-form/>

- Built a credit card form with live input validation, real-time card preview, and smooth UI transitions
- Implemented custom client-side validation logic simulating the kind of data sanitization required on the backend
- Focused on code quality, separation of concerns, and maintainable JavaScript structure

ADDITIONAL INFORMATION

Languages: Arabic (Native), English (Professional working proficiency)

Interests: Backend architecture, system design, machine learning, DevOps
